BOG BE GONE!

Accelerator Pump to Throttle Linkage System

Ready Racing's Rapid Response carb modification (R4) is a simple bolt on performance improving product. R4 replaces your existing standard linkage system that connects to your accelerator pump inside your carb with Ready Racing's new patent pending linkage technology. R4's design allows for immediate rapid throttle response, eliminating 4 stroke hesitation/bog.

- * Immediate response to throttle movement
- * Eliminates delay and bogging
- * Improves low end performance
- * Reduces hot engine stalling
- * Ideal in conditions that require precise throttle response
- * Bolt on product that requires no modification
